Abstracts and workshops contact:
m.f.pedersen@dadlnet.dk

1. For professionals concerned with communication.
 2. Disorders specifically related with the human voice.
 3. Voice issues important to clinical and pedagogical practices in the modern world.
 4. WVC stimulates education, disseminates information and initiates and coordinates meetings and global congresses.
 5. WVC promotes the contacts among the various voice disciplines (medicine, art, science, IT, etc.), by stimulating interdisciplinary scientific and clinical research.
 6. As an umbrella organization of voice matters the World Voice Consortium is concerned with wide aspects of voice, from the development of voice in children, organic, functional, psychosomatic and neurological voice disorders to issues of the singing and the artistic voice.
 7. Voice is especially important in the modern societies, and no verbal communication would be possible without a human voice, no matter the advances in the artificial intelligence.
-
1. WVC is a worldwide, non-profit, non-political, non-governmental organization concerned with clinical, scientific and professional voice issues.
 2. WVC promotes voice care, voice research and voice disorders prevention.
 3. WVC aims at establishing worldwide standards of diagnostic, therapeutic, habilitative, re-habilitative, preventive and public health aspects affecting the human voice.
